

Gaurav Arora

Principal Product Engineer · AI agents, backend and mobile

Gurgaon, India · Open to global remote · gaurav.arora90@gmail.com · buildwithgaurav.me · linkedin.com/in/gaurav-arora-7933692a

SUMMARY

Principal Product Engineer with 15 years of building production software across mobile, backend and AI. At Raaho, the engineering link between the founders and a 10-member team, and architect of a 50+ microservice backend. Most recently designed and built Zenith, an AI support agent on Claude that is live inside a ticketing app. Earlier, led mobile engineering for a digital banking platform running in 12 countries and for Nigeria's leading payments app. Looking for principal or staff engineering roles at AI-first companies.

EXPERIENCE

Principal Product Engineer

Apr 2021 – Present

Raaho · Logistics tech startup · Gurgaon

- Engineering link between the CEO, co-founders and a **10-member cross-functional team**. Own architecture, hiring and technical decisions, from requirements to production.
- Architected **50+ microservices** in Go, Python and Java, and delivered four production apps: Driver, Trucker, Shipper and Ops.
- Led the move to Flutter in 2022. Went from Android specialist to full-stack principal in under two years.
- Built Mira Bot and Chhotu Bot, AI agents on OpenClaw that automate GitHub, CleverTap and cron-job monitoring, **cutting manual ops work by 80%**.
- Brought AI-assisted development into the team's pipeline, removing QA and design bottlenecks.

Go · Python · Java · Flutter · Android · AI agents · Microservices · DigitalOcean · Firebase · CleverTap

Independent Consultant, Product Engineering and AI

2023 – Present

Independent · Remote

- Zenith, an AI support agent (2026)**. Designed and built the help and support chat for a live-events ticketing app, live in production. Claude runs a bounded loop over ten tools. Refunds and support tickets need the user's confirmation, so the agent cannot change anything on its own.
- Built the tooling to run and change it safely: an ops dashboard, a Replay Lab that re-runs past chats against new code, a cost ledger per feature, and per-client prompt and tool packs. Case study: buildwithgaurav.me/blog/zenith-ai-support-agent
- Closed-loop NFC prepaid payments**. Sole engineer on a tap-and-pay system for malls and events: Flutter app, backend integration, NFC hardware communication and payment flow. Users load balance onto a physical card and it is deducted at each purchase. Live in production.

Claude API · TypeScript · Node.js · SQLite · Flutter · NFC · Closed-loop payments

Lead Mobile Engineer, DBXP (digital banking)

Jun 2018 – Mar 2021

Mahindra Comviva · Gurgaon

- Led mobile engineering for DBXP, an enterprise digital banking platform running in **12 countries**, as part of an 85-member global team.
- Delivered the iOS and Android apps with 100% test coverage, automated CI/CD with Jenkins and Fastlane, and led the Java-to-Kotlin migration.

Kotlin · iOS · MVVM · Dagger 2 · Jenkins · Fastlane · Firebase · Mixpanel · TDD

Lead Mobile Engineer, Zoto (payments super-app)

Apr 2016 – Jun 2018

Mahindra Comviva · Gurgaon

- Built Zoto, **Nigeria's #1 recharge and payments super-app** (comparable to Paytm), serving millions of users.
- Implemented USSD interception with Android Accessibility Services, a critical payments feature for the African market.

Kotlin · MVP · LiveData · Dagger 2 · Accessibility Services · Jenkins · Firebase

Android Developer, mid to senior

Sep 2011 – Apr 2016

Rockstand Digital · Classic Informatics · A-1 Technology · Delhi NCR

- Built an eBook and eMagazine reader at Rockstand (MuPDF, payment gateways), and taxi, chat and meeting apps at Classic Informatics.
- Performer of the Month at Classic Informatics for the Direct Cab Call application.

SKILLS

AI and agents Tool-calling agents, Claude and OpenAI APIs, OpenClaw, prompt caching, replay-based testing, cost tracking

Backend	Go, Python, Java, Node.js and TypeScript, microservices, system design
Mobile	Android (Kotlin), Flutter and Dart, iOS, MVVM, MVP, TDD
Payments	NFC tap and pay, payment gateways, digital banking, USSD
DevOps	DigitalOcean, Jenkins, Fastlane, Firebase
Analytics	CleverTap, Mixpanel, Smartlook, Branch
Leadership	Team of 10, hiring, mentorship, reporting to CXOs

EDUCATION

B.Tech, Computer Science (Honors), 78.99%

2007 – 2011

B.M. Institute of Engineering & Technology (M.D.U.) · Sonapat, Haryana

Notice period: 60 days.
